

# Weed burning products

**Energy efficient, high temperature insulating products for your (hot gas) weed burning machines!**

## **Gastight GPE (CB) Gaskets**

The Insulcon GPE (CB) Gaskets have unique, gastight, water repellent and flexible sealing capabilities. Our GPE Gaskets and GPE CB Gaskets can be applied around the burner and is sold worldwide. They are ready to use seals, which can be used at temperatures up to 800°C if used as an enclosed seal.

## **Wearflex® Insulation Covers (WIC's)**

WIC's are tailor-made prefab insulation mattresses, which are being used to insulate all kind of shapes. World wide Insulcon's WIC's are being used to protect surrounding parts against radiation heat. They are easy to install and to remove.

## **Heat resistant outlet strips**

In order to prevent cold air ingress and at the same time hot air outlet between the asphalt and the burner machine, you can use our heat resistant strips. We deliver cloth that has a high abrasion resistance, a high tensile strength and is long lasting.

## **Fiber products and fabrics**

Insulcon can also be your partner in supplying customized fiber products, like blankets, papers, etc.

## **High thermal resistant textile**

We are also a manufacturer for high temperature resistant ropes, tapes and packing's in various qualities. These products have a temperature resistance up to 1400°C.

For more detailed information about these products, please do not hesitate to contact one of our specialists.
